Injectable Testosterone Undecanoate is an extremely long ester base testosterone compound that is primarily used in the treatment of low testosterone. Comprised of Testosterone Undecanoate, this is the same hormone and ester used in the oral anabolic steroids (such as Undestor Testocaps or Andriol), an oral Testosterone pills.

Restandol (Andriol) is a unique oral testosterone product, developed by the international drug firm Organon. One of the more recently developed anabolic steroids, Andriol first became available in the early 1980's. This compound contains 40 mg of testosterone undecanoate, based in oil (oleic acid) and sealed inside a capsule.

Testosterone undecanoate.

Testosterone undecanoate is an ester of testosterone, which is converted in the human body mostly into dihydrotestosterone, as a result of which testosterone undecanoate is only minimally aromatized, i. E.

Only a small part of the substance can be converted into estrogens. dihydrotestosterone is not aromatized. [best site](#)
