Tren (all forms) is a 19-nortestosterone (19-nor) anabolic steroid. Tren belongs to the same class of steroids as Nandrolone, 19-nor, which refers to the testosterone hormone lacking the carbon atom at the 19th position. However, with Tren it's a bit more complex as Tren is simply a modified form of the Nandrolone hormone. Test 600x™ D-Anabol 25® Deca 25® Tren 75® Overall Body & Brain Health; Lean Muscle Growth; Recovery; Strength; Fat Loss; Retail Price: \$610. \$307.00. You Save: \$303. More Info > Cutting Stack. We can offer you the most interesting drugs for bodybuilders. [view website](#)

Both the variants of Trenbolone are available in the form of intramuscular injections. Tren Acetate is available in doses ranging from 50-150mg and you should take it every other day. That amounts to an average of 400mg Tren in a week. Tren Ethanate is available in 200mg doses and should be taken thrice a week as well. For this cycle you'll inject every day for 12 weeks: Week 1-12 - 50 mg/day Test Propionate, 50-75mg/day Trenbolone Acetate, .5mg/eod Arimidex. Throughout the cycle use a Dopamine agonist like Dostinex to reduce the amount of prolactin if necessary. (Optional) Week 1-2 - 80-120mcg/day Clenbuterol.
