HGH Peptides, also known as Growth Hormone Releasing Peptides are known to stimulate the production and release of growth hormone in the body, that may help treat the symptoms of growth hormone deficiency and yield anti-ageing benefits. HGH-releasing peptides, like Sermorelin and Ibutamoren, are used for HGH therapy ...

HCG 5000 IU Livzon. \$45.00. HGH Peptides are well-tolerated steroids. They are a safe way to increase the natural production of human growth hormone. At UGFREAK, we have over 60 approved peptides available. You can also take them in combination with optimal results. Peptides are safe to use for men and women regardless of their age. HGH or somatotropin causes a pronounced acceleration of linear growth mainly due to the growth of long tubular bones (bones of the extremities). The usual concentration of growth hormone is 1-5 ng/mL. As for the peaks, it can reach the level of 10-20 ng/mL, and even 45 ng/mL. HGH was thoroughly studied in 1956. Pharmacom HGH 100iu injection € 175.00 € 130.00. Ansomone HGH 100iu injection € 165.00 € 130.00. Dianabol Blue Hearts 10mg 500 tablets € 85.00 € 65.00.
