PT 141 (Bremelanotide) Dosage. A study was published in 2016 that tested its use on women. It was determined in the study that a dose of 1.25 mg and 1.75mg was the dosage to use to improve sexual desire. This drug is an injection. Most Bremelanotide being sold today comes in liquid form and in 10mg bottles. PT 141 Female Experience. This post is about my recent experience with Bremelanotide or PT-141. The peptide is supposed to be a libido enhancer with the effect of producing erections and boosting sex drive in both men and women. It can either be injected or inhaled via a nasal spray. A much higher dosage is required for the nasal spray and, as the stuff is very costly ... PT-141 is in a new class of drugs that works on the part of the brain involved in sexual function. What was your dosage? May 8, 2014 #3 N. No Known Address Member. 1 milligram ; 10 units . May 8, 2014 PT-141 is a version of MT 2 with less tanning properties so I suggest picking one or the other. Note than many people need sleep to activate the affects of these. A woman in another thread here felt strongly that MT2 was better for libido, but I find them both to work. <https://sway.office.com/yp9zOKvBSI6SSDu5>
