Trenbolone Enanthate is a 19-nortestosterone (19-nor) anabolic androgenic steroid. The 19-nor label refers to a structural change of the testosterone hormone in that it lacks a carbon atom at the 19 th position. This is the same classification given to the popular Nandrolone hormone that makes up the popular anabolic steroid Deca Durabolin.

Tren actually has five times the anabolic strength of testosterone, making it a favorite amongst seasoned steroid users. Because of its strength, the dosage for Tren can be pretty low. Doses start at as low as 200 mg per week, split into injections every other day. This increases to 400-500 mg at an intermediate level. [find out this here](#)

Trenbolone Enanthate (Tren-E) Cycle. Commonly known as Trenabol, this is a derivative of the nandrolone anabolic-androgenic steroid. Tren Enanthate is a long acting form of Trenbolone. As with all Trenbolone cycles, it's always recommended to use Trenabol alongside testosterone to make up for the slow down in natural testosterone production. Adrenocortical hypofunction

- 1^o-due to adrenal disease(admission's disease)
- 2^o-following use of systemic steroids
- Addison's disease- (autoimmune)
- c/f-hypotension,hypoglycemia,hyperpigmentation,vulnerable to any stress such as infection, trauma, surgery, anaesthesia, fatigue, weakness, lethargy, weight loss,anorexia,dizziness
- RE-most patients are treated with oral hydrocortisone and fludrocortisone
- Dental aspects:risk of ppt hypotensive collapse,prefer LA for pain control (over conscious sedation and GA),oral hyperpigmentation

In the cycle of cutting - a full cycle of accumulation is recommended of 50 to 100 mg of Trenbolone every 2nd - 3rd day. Similarly, an advanced user may also use a higher amount of trenbolone per dose (reaching up to 200 mg every 2-3 days). Of course, increasing the dosage, an increase of serious side effects risk is possible.

The amount of Tren that you can use will depend on your purpose. If you are trying to cut your bulk,

you need to take 100 to 200 mg of Tren every other day. If you are in the process of building your muscles, you must take 50 to 100 mg of Tren every other day. [pop over here](#)
