Testosterone Cypionate

200mg/mL in grapeseed oil - 30mL Vial Enroll or Sign In for pricing Our intramuscular testosterone cypionate injections are commonly used to manage congenital or acquired hypogonadism and other conditions that cause testosterone deficiencies. The testosterone used in this medication is derived from plants. This is a controlled medication, commonly prescribed for the treatment of low testosterone levels in males (hypogonadism) who do not produce enough natural testosterone. Testosterone Cypionate is an injectable compound that is slow-acting, a long-ester, and oil-based. This product will arrive as two 5ml vials.

Commonly Abused Steroids

Oral Steroids	Injectable Steroids
■ Anadrol (oxymetholone)	■ Deca-Durabolin (nandrolone decanoate)
■ Oxandrin (oxandrolone)	■ Durabolin (nandrolone phenpropionate)
■ Dianabol (methandrostenolone)	■ Depo-Testosterone (testosterone cypionate)
■ Winstrol (stanozolol)	■ Equipoise (boldenone undecylenate)

Administration of testosterone undecanoate injection has been associated with cases of serious pulmonary oil microembolism (POME) reactions as well anaphylactoid reactions. Reported cases of POME reactions occurred during or immediately after intramuscular injection of testosterone undecanoate. [visit this web-site](#)
